STAT

MEMORANDUM FOR:

[redacted]
Chief, Technical Liaison Branch/OS

STAT

FROM:

[redacted]
DA/Management StaffSUBJECT: Use of Television and Monitor Equipment with the
New Video Distribution System

REFERENCE: Your Memo, dtd 26 Jul 89, Same Subject

1. Attached is a list of the televisions/monitors and videocassette recorders currently located in the area of the Deputy Director for Administration. All will be hooked up to the new classified video distribution system. Since parts of the area will relocate twice in the next year as part of the Backfill program, I have noted the approximate dates when each piece of equipment will be located in a given area. Most equipment is now, and for the upcoming year, will be located in Zone II areas. All equipment will be relocated to the 7D area in the fall of 1990. In 1990, the 7D area may be upgraded to Zone III as the result of the installation of new windows.
